++ - Walker was timed officially at 90y in 8.6, during a 150 yard race at the Southeastern AAU, which he won in 14.1. His slowest p at 100y was 9.6, though 9.5 was more likely [8.6+1/6*5.5 = 9.517], and at 100m, 10.4 was similarly probable [8.6 +19.36/60*5.5 = 10.

Nutting [9.7] is described in the generally reliable LA Times of May 15 as finishing "just over a yard behind" Talley [9.5] which wo but the Nevada State Journal notes that Nutting was 2 yards behind

@ - The following note has been added to the WR evolutuin book [since the last edition in 2015]

National, handicap, Sao Januário Stadium: 1. de Assis 10.2 - off scratch (10.2 - 10.2 - 10.3). Track measured 100.01m, Ulf Lagerstrom noted that there was a strong cross wind and the mark was not submitted as a record as it was "too fast" per local officials. In 2014 UL reported that after further researches, the report submitted to the Brazilian federation was located, and it declared that the race was not wind assisted, and that the record was not accepted as it was a handicap race.

NOTES

1938 Lists appearing in Volume 3 of Track and Field Performances through the years have been expanded and adjusted as follows:

Where known, full birthdate and height/weight data have been added

Indoor marks have been integrated into the main lists for the Jumping events and the Shot Put.

Where relevant, indoor marks have been added at the end of track events in a supplement.

For imperial distances for 1 to 6 Miles, the equivalent [and unofficial] mark for the nearest metric event has been shown in parentheses, with a note to explain how the mark was calculated.

Relay events have been extended to show the top-20+ nations in the 4x100 and top-17 in the 4x400
