Roy	Sandstrom	GBR	11 Jul	31	174/70	9,7		(2)		Birmingham	24-Sep

(45 wind-assisted performers)

* = The wind gauge operator A.C.Greene, reported in "Track and Field News" in October 1959, "The wind touched 7.32 mph (3.3 m/s) at the 25 yard mark, was back to 3.5 (1.6 m/s) or less at the end, and was virtually zero at the start". The average wind rule, if applied, would have yielded a reading of +1.7 or +1.8, and so this might have become the first official 9.1

In 1500m, equivalent column items marked in red represent 1500m equivalents superior to marks appearing in 1500m lists, items in black are inferior to 1500m best for athlete, while marks highlighted in yellow are for athletes not appearing in 1500 list. The equivalents are shown to the level of 100th in the 1500m lists. In total there are 133 athletes at 3:51.8/4:10.2y or better. The 1956 ATFS Annual included athletes from 68th [4:11.0] to 100th [4:13.5]. 1500m equivalents have been taken as the Mile time multiplied by 0.926 100th is at 3:50.8 [equivalent to 4:09.2 for 1 Mile]

(50 performers)

The initial 1955 lists which appeared in the 1956 ATFS Annual have been updated as follows:

Where known, full birthdate and height/weight data have been added

Indoor marks have been integrated into the main lists for the Jumping events and the Shot Put.

Where relevant, indoor marks have been added at the end of track events in a supplement.

For imperial distances for 1 to 6 Miles, the equivalent [and unofficial] mark for the nearest metric event has been shown in parentheses, with a note to explain how the mark was calculated.

Relay events have been extended to show the top-20 nations in the 4x100 and 4x400
